Riverside Community Hospital - Discharge Summary

Patient: Morgan Ellis (fictional), 58-year-old
Admission date: November 2, 2026
Discharge date: November 5, 2026
Attending: Dr. Neil Okafor, Hospital Medicine

Diagnosis:
Community-acquired pneumonia, right lower lobe.

Hospital course:
You came in with 4 days of fever, cough with yellow sputum, and shortness of breath.
A chest X-ray showed pneumonia in the right lower lobe.
You received IV antibiotics and oxygen, and your breathing and oxygen level are now back to normal on room air.

Medications:
Amoxicillin-clavulanate 875 mg/125 mg by mouth twice daily with meals for 5 more days.
Finish all of the doses even if you feel better.
Azithromycin 250 mg by mouth once daily for 3 more days.
Take it at the same time each day.

Diet:
Drink plenty of fluids, about 8 cups (2 liters) of water or other non-caffeinated drinks each day, unless told otherwise.
Eat small, regular meals.
Your appetite may be low for a few days.

Activity:
Rest as much as you need for the first week and build up slowly.
Short walks around the house are encouraged.
Do not smoke and avoid smoke from others.
Return to work or school only after your follow-up visit.

Breathing care:
Take 5 slow deep breaths every hour while awake to help clear your lungs.
Cough up mucus rather than suppressing it.

Monitoring:
Check your temperature every evening for 7 days and write it down.
Notice whether your cough and breathing are getting better each day.

Follow-up:
See Dr. Neil Okafor, primary care on November 12, 2026 for a check-up and symptom review.
See Radiology on December 17, 2026 for a repeat chest X-ray to make sure the pneumonia has cleared.

Call 911 or return to the ER if:
- chest pain
- severe trouble breathing or you cannot speak a full sentence
- blue or gray lips
- confusion or fainting
- coughing up blood

Call the clinic at 555-0110 if:
- a fever of 101 F (38.3 C) or higher after 3 days of antibiotics
- your cough or shortness of breath is getting worse
- you cannot keep your antibiotics down
